# WHAT

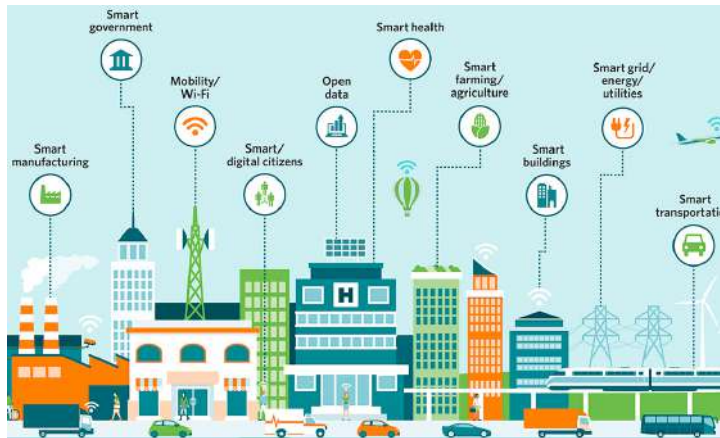

## Security and Data Flows in the EU: stumbling in our (digital) footsteps

Data protection  
as a crucial  
human right

General aspects

Smart city strategies are inherent in data, private or public. They relate to how we collect data, how we open up the data we use and the data we produce. So smart cities are affected in many ways by the GDPR laws.

Smart cities

- Stricter consent requirements
- Transparency
- Data processing by 3<sup>rd</sup> parties
- Data portability

Fintech

# WHEN
